

Erasmus Mascot 1

The Irish Earth Globe

Materials

White paper, colours papers, colours, glue, glue gun, four pipe cleaners, two yogurt tops, scissors, two small boxes, one big porexpan ball, two small porexpan balls, googly eyes, thin wire.

First, draw and colour in the flags of the Erasmus countries. Then cut them out and stick them around a large porexpan ball.

While they dry, get a black marker and some white paper, and draw lots of lines. Cut them out and glue them around two small boxes to look like the edge of a book.

Use two small porexpan balls for the eyes. Stuck googly eyes on to each ball and glue some eyelashes. Attach the eyes using a thin wire.

Use some coloured card to make the mouth and attach it using a glue gun. Use pipe cleaners to make the hands and legs. Use the tops of two yogurts for the feet.

At the end, glue all the parts using a hot glue gun.

Key objective

Develop creativity using different materials around a given topic.
